

Where is the data file located?

Authored by: **Robert Hudson**

Saved From: <http://tmsware.com/support/kb/article.php?id=5>

The data file is named CLMData.dat

It is located in the "virtual folder" %AppData%\CLM Explorer. This means the location is not absolute, it changes for everyone because it is part of your login user identity

Suppose your username is John

The folder will be something like C:\Users\John\AppData\Roaming\CLM Explorer

Sometimes you can simply enter %APPDATA% in your Windows Explorer, with the percent signs and it should find the folder for you.

If you can't see %APPDATA% then open Windows Explorer, click Tools >> Folder Options >> View Tab
Select the option to see hidden files and folders.
